

FENTON

FENTON

Beautifully understated with classic shaker styling, Fenton embodies the characteristics of this iconic design – simplicity, functionality and quality craftsmanship. The unadorned, slim-line framing is very current in kitchen furniture design, where the appeal is in the simple, elegant proportions which allow the materials and construction to shine. Added to which the door's simple lines and delicate woodgrain figuring provide the perfect backdrop for your choice of painted finish.

The ability to tailor Fenton to your own specific room or design requirements is important, that's why we offer made to measure door sizes as well as standard sizes, plus a varied choice of accessories that allow for further personalisation.

The twenty three strong paint palette offers something to suit all tastes; from rich, brooding dark and warm tones, through to softer shades and gentle neutrals. The warm tones of Tuscan Red or Baltic Green add layers of depth whilst the lighter shades of Pale Rose and Pale Smoke create balance and soften the overall effect.

Delicate antique brass handles complement the slender proportions of Fenton as well as introducing a warmer note in their luxurious metallic finish.
